

Student Participation

The event was promoted extensively among our students and students are encouraged to submit ideas for the problems posted in SIH site, ie., from sih.gov.in. We received enthusiastic responses. Total 336 students registered to participate, forming **56 teams** with diverse skill sets, backgrounds, and expertise. This ensured a wide range of innovative solutions for the selected problem statements for the themes.

Problem Statements

Teams were given access to problem statements specific to each theme. These problem statements were sourced from SIH(sih.gov.in) and real-world challenges faced by government departments, industries, and non-governmental organizations. Each team chose one problem statement to work on.
